

PLANT MORE TREES

Dear Parents,

Our planet, the blue marble -EARTH- is one of its kind in the magnificent universe.

It is our foremost responsibility to keep its green cover intact. With every passing day, with our routine activities, we are tearing this green blanket off the Earth.

So, it is our duty to make our children morally aware of the steps to be taken to keep our planet enveloped in a healthy green cover.

The theme at Brats 'n' Cuties for the month of April is "Plant More Trees". We can encourage our children to plant more trees and preserve it.

As facilitator we took the children around the school and showed them the various plants-big and small ,the teacher also spoke about the importance of trees- it gives us shade , fruits , vegetables and the most important it gives us fresh air.

We can reinforce the same through these activities :

1. If you have enough space, make a kitchen garden at home. It's a great way of bringing about creativity and making children understand the importance of going green.
2. We can have 3-4 pots where we can encourage our kids to plant saplings in it and can keep it in the balconies and can ask them to water the plants everyday and nurture them.

These are the points we have discussed with the children at School. We would be glad to know your ideas of making the children aware about the theme. Kindly share your ideas of making the learning experience more interesting for the children.
